

# Merry Tiller & Landmaster

## Cultivators

# Power and versatility from Merry Tiller and Landmaster

The old school of thought was that worthwhile digging could only be accomplished by the use of the spade. Remember those long weary hours of digging, hoeing and weeding? Of all the tasks in the garden they were the least rewarding; equally they are perhaps the most important.

## Planning

Preparing the ground for Spring cropping should begin the previous Autumn, ploughing or cultivating just deep enough to bury surface trash. If you are breaking new ground for the first time, your best plan is to cultivate fairly shallow with the slasher rotors and then run over again in a few days to bury the exposed material. Early ploughing or cultivating will give a valuable frost tilth. Keep Spring cultivation shallow to preserve the frost tilth and keep the seed bed level. Only our basic finger rotors can produce a fine seed bed in one operation. They are especially designed to prevent excessive pulverisation and hard pan. Choose the right time to cultivate the ground. Tackle the job when the soil is fairly dry and friable, avoid cultivating when it is wet and sticky, this will destroy the soil structure and reduce yields.

Your garden layout should be planned to make the best use of your cultivator. For instance the rows in your garden should obviously be as long as possible since this will save a lot of time and space in having to keep turning your machine round.

The versatile Merry Tiller and Landmaster cultivators require the minimum of servicing, will serve you well, giving you years of good service.

## Merry Tiller Attachments The right rotors are very important.

Gardeners throughout the country have found that the Merry Tiller provides exactly the right rotors for their particular jobs and soil requirements, i.e. rotors allowing complete and selective tillage.

In addition to providing the right rotors, Merry Tiller allows adjustment for depth and width. 'Gripper leverage' action allows control of depth of tillage up to 14" deep.

With Merry Tiller, there are three basic type of rotors.

**1 Finger Rotors** ... for seed bed preparation and harrowing in one operation. Give powerful traction, too. Merry Tiller finger rotors cannot be bettered; their 'stirring' action prevent excessive pulverisation and hard-pan - a feature acclaimed by soil experts everywhere. Depending on extensions used; finger rotors cultivate 12", 22", 33", 44" or 55" wide and up to 12" deep.

**2 Slasher Rotors.** These tough slasher rotors are guaranteed for a lifetime! Heavy spring steel blades give unequalled digging power and, being curved, they minimise 'wrapping' when burying weeds, trash, etc. Depending on extensions used, slasher rotors cultivate 15", 24", 37" or 50" wide and up to 14" deep. There are special Narrow Slasher Rotors for cultivating between crops; digging width is 9 1/2".

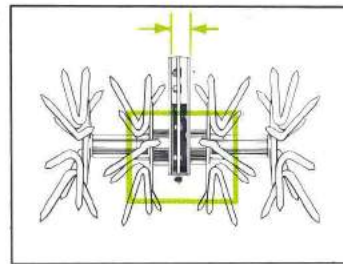

**3 Pick Rotors.** Merry Tiller Pick Rotors work where others fail, having 16 massive pick points strong enough to break through clay, gravel or hardpan. Ideal when breaking down new gardens where ground is hard packed, they can also be used for trenching and ditching. The addition of a Vee-Plex Clutch Pulley provides the drive to power-driven attachments, (see pages 6, 7 and 8) and at the same time protects those attachments from damage in the event of overloading.

With a Merry Tiller or Landmaster Cultivator, you can do all the work with no sweat and in a fraction of the time. Today there are thousands of Merry Tiller and Landmaster users with up to half an acre - yes, and even bigger areas, managing to produce a weed free, well kept garden single handed.

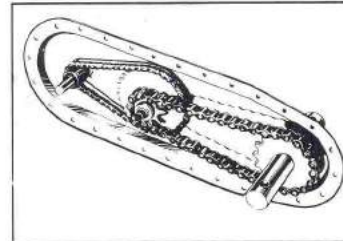

## Landmaster Lion Cub and L88 Super Attachments LM AC 3470/3471

The Landmaster Lion Cub and L88 Super not only cultivates but also takes Hoe Blades, Spin Weeder attachments. Rotate the tool head 90°, fit the Rotary Lawn rake and you have an accessory that will bring your lawn to life with the removal of thatch that compacts your lawn surface. See Price List for full details.

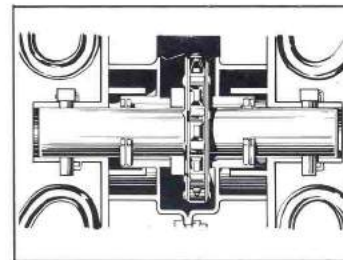

## Just some of the features that make the 'Merry Tiller' Britain's best selling cultivator

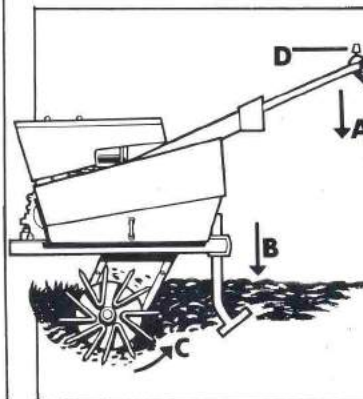

**1** Transmission is housed in a tough, slim case 2" wide. This allows full width, full depth rotor penetration. There is no strip of semi-cultivated soil left in the middle. The rear skid is a final check to ensure that you cover all the ground. Subjected to the hardest kind of use, the Merry Tiller transmission has consistently proved most troublefree.

**2** Drive principle is the finest. Rugged, efficient drive transmits more power to the rotors - the point where power really counts. It is not only more efficient, but requires far less upkeep than power robbing, high friction worm gear drives. The rotors propel the cultivator as they work the soil; power is not wasted on the wheels.

**3** Heavy duty, hardened-and-ground rotor shaft is mounted on wide, needle roller bearings. Double lipped seals keep oil in and dirt out. Result is a long, trouble free life.

**4** Easiest, deepest digging. Heavyweight results without need of a heavyweight operator; this is the deep digging Merry Tiller. Slight downward pressure on handles, (A) regulates depth of cultivation with rotors (C). As more resistance is applied through skid grip (B) in soil. Depth of skid grip controls depth of cultivation with rotors (C). As more resistance is reduced, skid grip (B) comes out of the soil and the rotors walk across the surface. Takes the TOIL out of the TILLING. A trigger lock on the clutch control (D) may be used to keep clutch engaged during periods of sustained use.

# Cadet

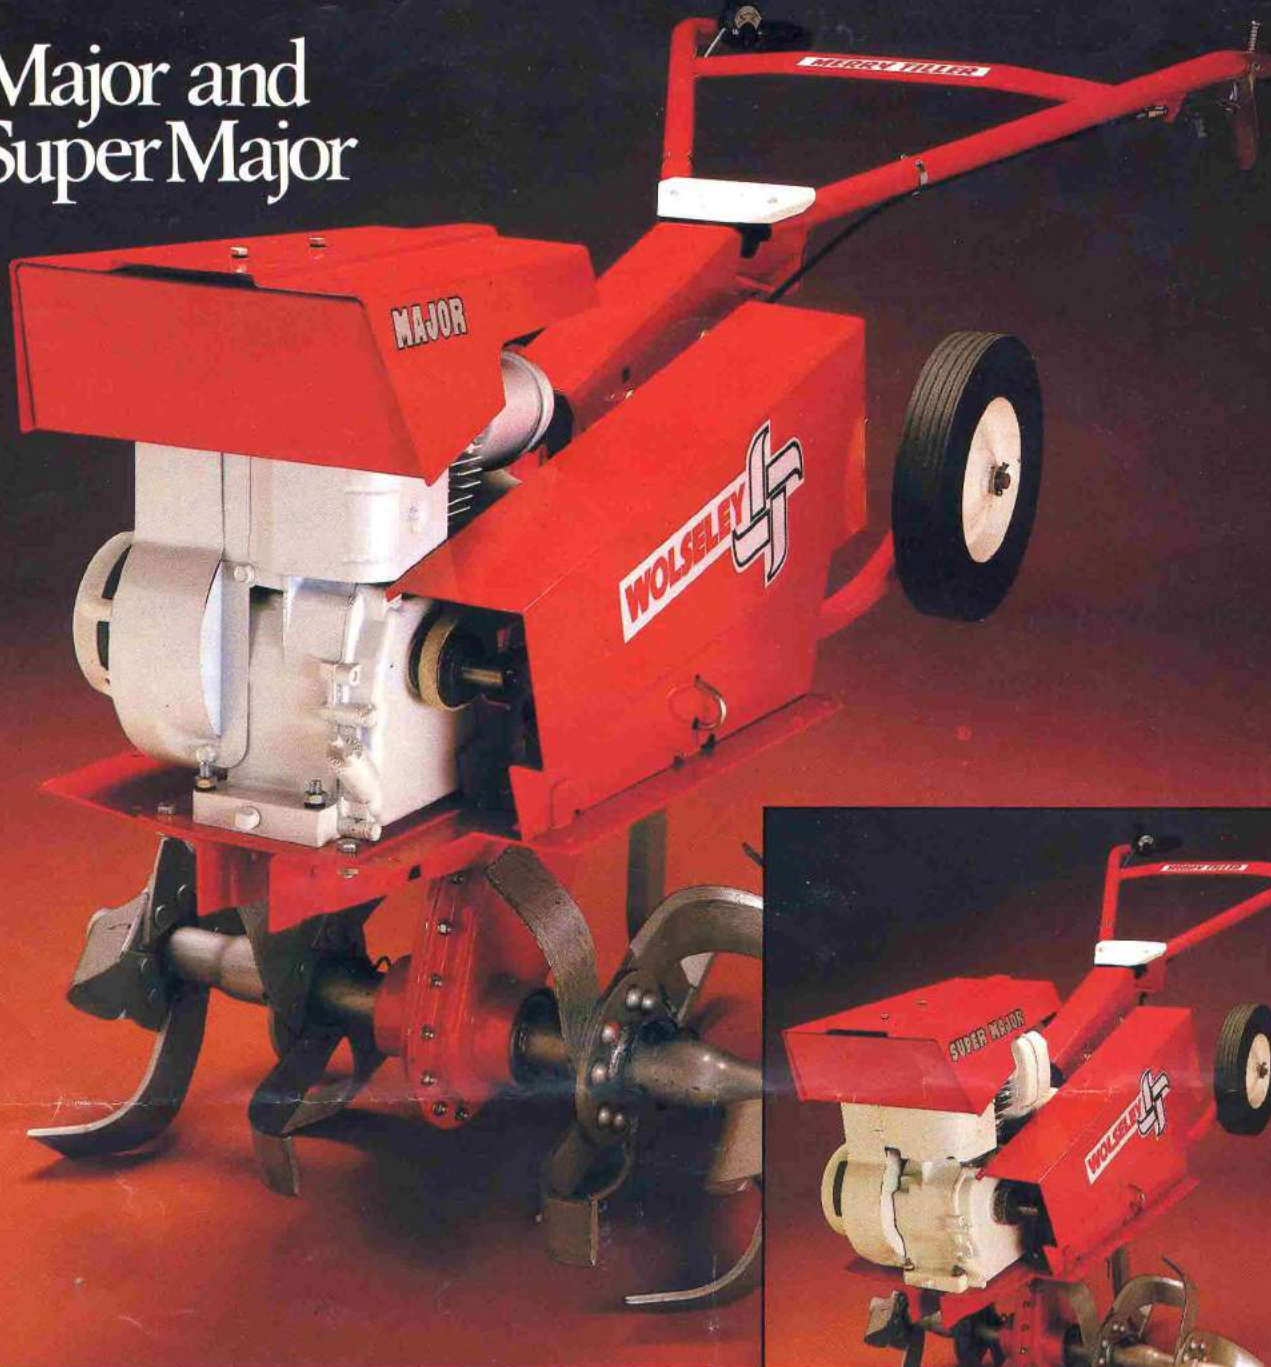

## 3 H.P. 127 C.C. CADET A new level of cultivator value Model AC3409

- Light in weight (only 89 lbs) – easy to use.
- 3 hp Briggs & Stratton engine gives generous power.
- Digs 12" deep x 26" wide with double rotors.
- Efficient chain and sprocket transmission.
- Transport wheel for ease of moving from site to site.
- For weeding and inter-row work narrow rotors are available as optional extra. (Illustrated opposite.)
- A ridger with 1 pair of traction wheels for planting potatoes and earthing up between rows of vegetables is available in kit form. (Illustrated opposite.)

# Major and Super Major

## 4 H.P. 187 C.C. MAJOR For the keen gardener. Model AC3419

For the gardener keen to cut living costs with homegrown fresh garden produce, the 4 hp MAJOR will outwork any other low-priced Tiller in the field and comes complete with 2 pairs of slasher rotors and strong detachable transport wheels.

- Light in weight – easy to handle.
- 4 hp Briggs & Stratton engine – quiet running and reliable.
- Deep digging rotors – unconditionally guaranteed against breakage.
- Digs deep and wide – fast. 14" deep x 24" wide with 2 pairs of slasher rotors. 12" deep x 33" wide with 3 pairs of basic finger rotors.
- Adjustable handles – can be offset, raised or lowered.
- Reverse drive attachment available.

All accessories and attachments can be used except the plough and sickle mower.

## 5 H.P. 206 C.C. SUPER MAJOR – for tougher land and virgin soil. Model AC3429

The 5 hp SUPER MAJOR is ideal for the gardener with a large area to cultivate. It takes tough compacted land, virgin soil, hard-pan and clay in its stride and is complete with strong detachable wheels and 2 pairs of slasher rotors.

- Light in weight – easy to handle.
- 5 hp Briggs & Stratton engine giving 25% extra power – with less effort.
- Deep digging rotors – unconditionally guaranteed against breakage.
- Digs deep and wide – faster. 14" deep x 37" wide with 3 pairs of slasher rotors. 12" deep x 44" wide with 4 pairs of basic finger rotors.
- Adjustable handles – can be offset, raised or lowered.
- Reverse drive attachment available.

All accessories and attachments can be used except the plough and sickle mower.

# Titan

## 5 H.P. 206 C.C. TITAN Model AC 3449

The Titan cultivator is a practical easy-to-handle two wheeled tractor and ploughing unit in one. All the advantages are yours in this compact Merry Tiller Titan cultivator. Complete with detachable transport wheels and 2 pairs of slasher rotors.

- 5 hp Briggs & Stratton engine with heavy duty frame, triple chain drive for best power output.
- Digs 14" deep x 37" wide with 3 pairs of slasher rotors – or 44" wide with 4 pairs of basic rotors.
- Fully adjustable handles can be offset, raised or lowered for operator's comfort.
- Easy to handle.
- The 5 hp TITAN has a reverse gear drive built into the transmission case as standard – see illustration opposite.

This all-round heavyweight will take all attachments and accessories and will tackle and accomplish all jobs simply and reliably.

# Titan G.T.

## 7 H.P. 275 C.C. TITAN G.T. Two-wheeled tractor/cultivator - for professional growers, nurserymen. Model AC3459

A machine for all conditions. The most ruggedly built of all compact two-wheeled tractors and cultivators, the TITAN G.T. offers years of more productive gardening to all professionals. Complete with detachable transport wheels and 2 pairs of slasher rotors.

- 7 hp Briggs & Stratton engine for tremendous power.
- 4 forward and 2 reverse built-in gears.
- Fully adjustable handles can be offset, raised or lowered for operator's comfort.
- Ploughing and inter-row speeds from 23 rpm to 75 rpm.
- Digs 14" deep x 50" wide with four pairs of slasher rotors or 55" wide with five pairs of basic finger rotors.
- Rotary cultivating speeds from 133 rpm for light soil to 41 rpm for heavy ground.
- For an efficient tractor simply assemble 16" fully pneumatic tractor-grip

wheels to rotor shaft, these are adjustable to various row widths, and assemble the drawn implements of your choice. Illustrated below is the plough fitted

to the TITAN G.T. model.  
● Fully adjustable handles can be offset, raised or lowered for operator's comfort.

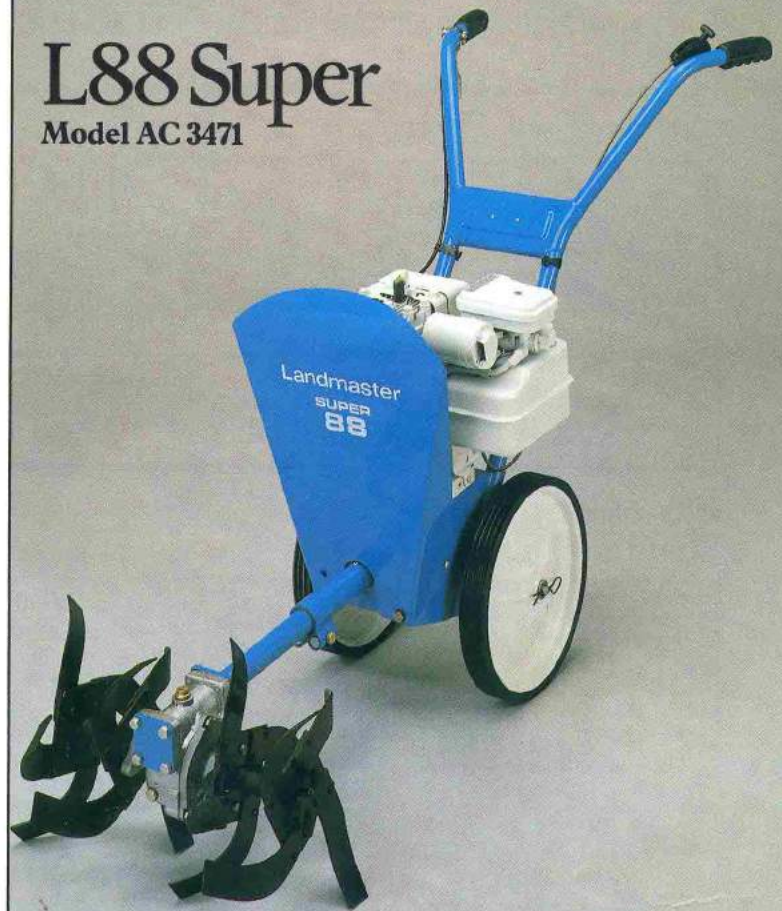

# Landmaster Lion Cub

Model AC 3470

# L88 Super

Model AC 3471

# L140

Model AC 3472

## Landmaster Lion Cub and L88 Super

The Lion Cub and L88 Super Cultivators have been for many years established favourites with generations of power gardening enthusiasts. Both machines are balanced so that the weight is over the digging rotors. The toolhead can be swivelled within a minute to provide reverse digging for finer tilth and to remove wheel and foot marks. The Lion Cub and L88 Super are simple to control and easy to handle.

The Lion Cub and L88 Super are tough versatile machines, designed to give you complete power gardening with this range of optional extra tools:

### Extra ancillaries for both machines:

- Rotary lawn rake (Scarifier) for keeping lawns in top condition.
- Spring steel hoe blades, inward or outward facing.
- Plough type static ridger.
- Spin weeder – destroys weeds instantly.
- Extra slasher blades and spindles for 18" or 24" width cultivation.
- Pick tines for breaking harder ground.
- 12" and 18" toolhead hoods for finer tilth on one 'pass'.
- Single wheel (L88) or narrow wheels (Cub) conversion kits for inter-row work.

### Landmaster L140

For the gardener who is cost conscious and sees home-grown fresh produce as a means to achieve cost savings, the Landmaster L140 cultivator is the machine.

- Digs deep and up to 24" wide.
- 4 hp 4 stroke Briggs & Stratton petrol engine.
- Easy-spin recoil start.
- High quality steel slasher rotors.
- Transport wheels for easy site to site movements.

# A Merry Tiller can do so many extra jobs

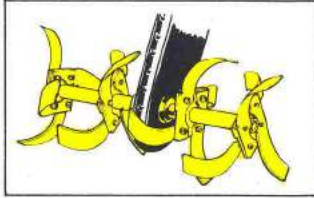

—choose the correct tool for the best results

## Cultivating Rotors

FOR MAJOR – SUPER MAJOR – TITAN – TITAN GT

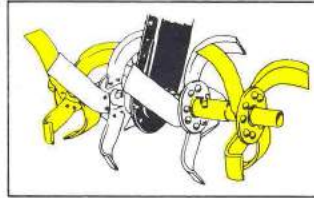

**BC 0001**  
Narrow Slasher Rotors (pair)  
Cadet only

**BC 0002**  
Double Slasher Rotors (pair)  
Cadet only

**MT 3443**  
Slasher Rotors (pair)

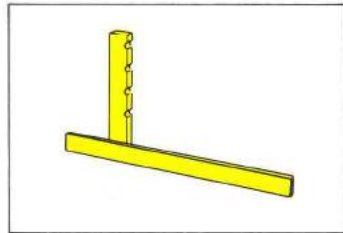

**MT 3444**  
Extension Slasher Rotors (pair)  
with MT 3443

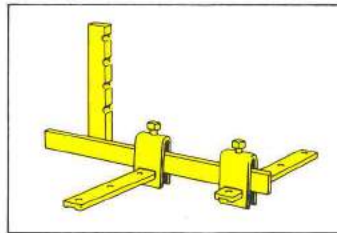

**MT 2547**  
Narrow Slasher Rotors (pair) –  
can also be used outside MT 3444

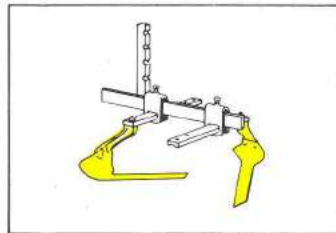

## Row Crop Equipment Standard Duty

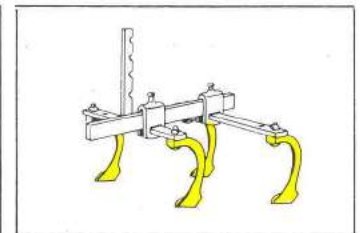

**MT 1530**  
Extension Bar

**MT 2496**  
Extension Bar c/w Cross Bars  
and Clamps

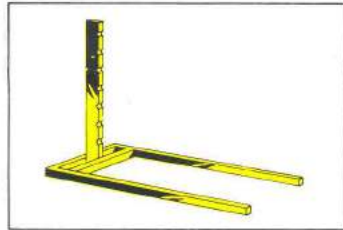

Fitted on MT 2496 –  
**MT 1521**  
Hoe Blades (pair)

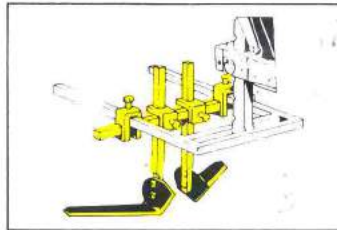

Fitted on MT 2496  
**MT 1574**  
Cultivating Feet (set of four)

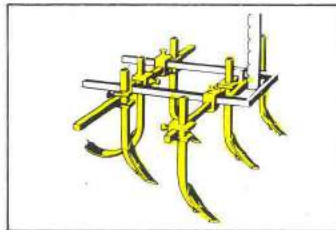

## Heavy Duty

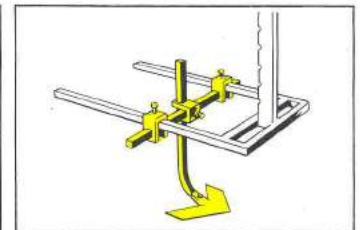

**MT 2760**  
Heavy Duty Tool Bar Frame Assembly

Fitted on MT 2760  
**MT 2741** Side Hoe – left-hand  
**MT 2746** Side Hoe – right-hand  
**MT 2764** 15" Cross Bar  
**MT 2738** Clamps

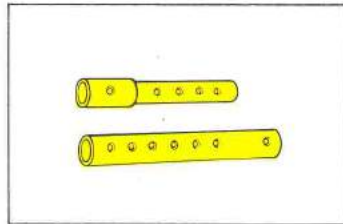

Fitted on MT 2760  
**MT 2748** Cultivating Feet (set of six)  
**MT 2765** 30" Cross Bar (pair)  
**MT 2738** Clamps  
**MT 2753** Depth Skid

Fitted on MT 2760 –  
**MT 2764** 15" Cross Bar  
**MT 2805** Flat Sweep  
**MT 2738** Clamps

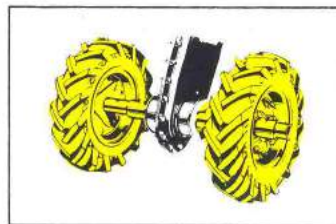

## Traction Wheels and Extension Tubes

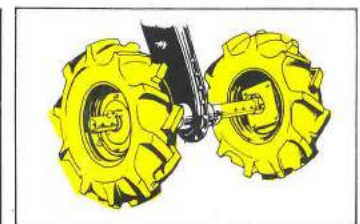

**MT 2142** Extension Tubes  
**MT 3385** Heavy Duty Extension Tubes

**MT 2276** 10" Traction Wheels (pair)

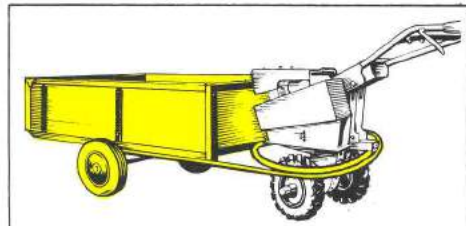

**MT 2316** 12" Pneumatic Traction Wheels  
(pair) with 1 pair MT 2142

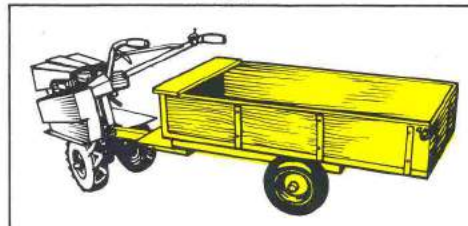

**MT 4320** 16" Pneumatic Traction Wheels  
(with Ratchet) (pair)  
with 1 pair MT 3385

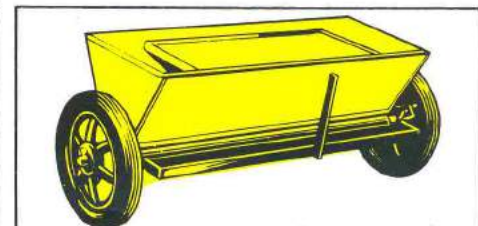

## Other Approved Accessories for Merry Tillers

**5 cwt Tipping Truck** (complete with Fixing bracket) Use 10" or 12" wheels only Suitable for all models. MT 2276/MT 2316

**10 cwt Tipping Truck** (complete with Fixing bracket) Use 16" wheels and extension. For Titan and Titan GT only. Tubes MT 4320/MT 3385

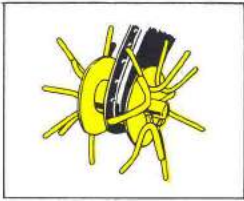

**36" Truspred seed and Fertilizer Distributor**

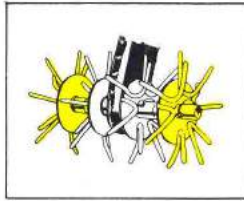

The Merry Tiller is quickly and easily adapted for numerous applications, simply slip on the attachment and fasten. On all models, height and width settings may be adjusted for various attachments and jobs. Adjustable width rubber

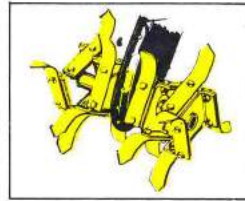

tyred traction wheels, in three sizes, are available. Such a wide selection of drawn implements makes it easy to maintain a weed free garden or plot throughout the year.

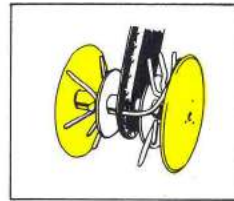

**MT 1101**  
Basic Finger Rotors (pair)

**MT 2323**  
Basic Finger Rotor Extensions (pair) on MT 1101

**MT 8056**  
Pick Rotors (pair)

**MT 4581**  
Protective Discs for use with finger and slasher rotors.

# Ploughing Equipment

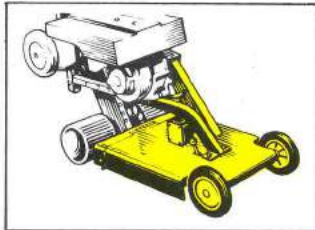

**MT 4562** Plough c/w Mounting Bracket  
**MT 3336** Front Weight and Bracket (set)  
**MT 3386** Wheel Weights (pair)

As a ploughing unit the Merry Tiller is a revelation. When fitted with reversible plough and 16" traction wheels, or spade lug wheels which we recommend in exceptionally heavy soils, furrows from 6" to 10" wide and 6" to 10" deep can be quickly ploughed. It can be easily set, it is fully reversible, trash and unwanted vegetation can be buried thus improving the humus and condition of the soil. It is recommended that ploughing be done in the Autumn leaving the soil to winter as fallow land. This would increase and improve its fertility when you commence your cropping plan in Spring.

# Grass Cutting Equipment

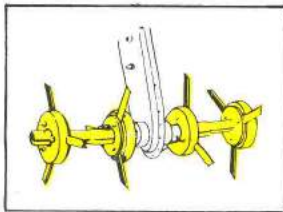

**MT3757**  
 36" Sickle Mower Attachment

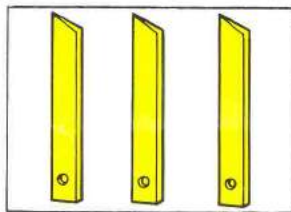

**MT 4508/BC 0306**  
 19" Rotary Attachments.  
**MT 4509** As above but complete with Vee-Plex Pulley.

Designed and tested to withstand the toughest grass-cutting jobs, this 36" Sickle Mower will quickly cut all unwanted vegetation in orchards, paths, road sites and wooded areas. 16" Pneumatic Traction Wheels with extension tubes are used with the Sickle Grasscutter Attachment. 19" rotary attachment cuts rough grass and weeds in gardens, orchards, or on verges, etc. Adjustable height of cut: 1/2" to 3".

# Lawn Care and Turf Management Equipment

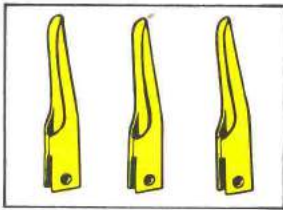

**MT 4511**  
 Aerating Rotors with Slitting Tines

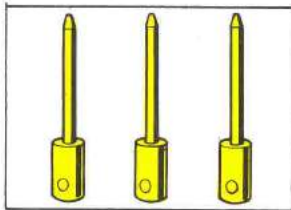

**MT4512**  
 Slitting Tines (set of twelve)

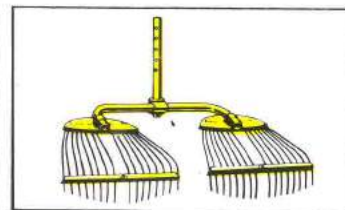

Correct aeration and good moisture/fertiliser penetration is vitally important for healthy root growth of lawns and turf. Rotor attachments for slitting, spiking and coring are available, enabling these essential operations to be carried out with a Merry Tiller. Slitting, spiking and hollow tines are interchangeable on the weighted rotor attachments.

**MT 4513**  
 Hollow Tines (set of twelve)

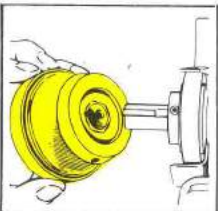

**MT 4514**  
 Solid Tines (set of twelve)

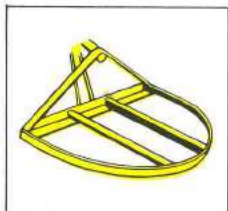

**MT 3003**
