

THE ETERNAL COMBUSTION ENGINE.

We've put a little extra into our Industrial/Commercial engines. Inside and out, they're made to survive the dirty, dusty, punishing life a working engine must survive.

All Briggs & Stratton I/C engines come with cast iron bores and Cobalite exhaust valves and seats for extra-long life. Plus valve rotators to help break up carbon deposits. Heavy-duty DU and ball bearings keep stress to an absolute minimum. Our time-proven Magnetron® electronic ignition never needs adjusting and delivers a far more powerful charge than capacitor discharge systems.

Our dual-element air cleaners actually filter air twice. Our aluminized Lo-Tone mufflers outlast and are quieter than just about any other on the market. Plus, you can get our optional new OilGard automatic low-oil shutdown system. In short, Briggs & Stratton

I/C engines can take it. For a long, long time.

This high specification also gives you our exclusive 2+5 year warranty. Two years on the engine. Five years on the Magnetron ignition.

THERE ARE STILL PLACES WHERE YOU CAN'T FIND BRIGGS & STRATTON SERVICE.

We still haven't reached space. But when it comes to Planet Earth, no one beats Briggs & Stratton. Almost anywhere you go, there's a service centre nearby offering factory trained technicians and genuine Briggs & Stratton replacement parts.

The reason is simple. We take as much pride in our product after the sale as we do before. In fact, service is one of the major reasons Briggs & Stratton is far and away the world's number one brand of engine for outdoor power equipment.

So when you sell Briggs & Stratton,

you're selling much more than a great engine. You're selling a commitment to your customers that you'll be there when they need you.

No matter where they are.
