

Colwood **MODEL 'RA'** ROTARY HOE

THE IDEAL MACHINE FOR USE ON CULTIVATED GROUND

The "Colwood" Model "RA" Rotary Hoe is a tool designed for growers who prefer the principle of rotary tillage, rather than using static implements. The machine has an overall width of only 12 in., making it particularly suitable for use between narrow plantings, whilst the rotor gives a working width of some 9 in. The Albion gearbox provides three forward speed ranges, enabling a fine tilth to be obtained to an average depth of about 4 in. to 6 in. The "Colwood" Rotary Hoe is extremely light and easy to handle, retaining all the most popular features of the well-known "Colwood" Model "B" Garden Tractor. The rotor mechanism is easily detachable, enabling the machine to be fitted with a full range of tillage implements and accessories as supplied for the "Colwood" Model "B."

Accessories available for either machine :—

- 18" & 24" tool bars.
- Light moulding plough.
- Light ridger.
- Set of static tools (for Model R.A.)

SPECIFICATION

Engine	1.2 h.p. 4-stroke Villiers Mk. 10, Governor-controlled.
Starting	Lever.
Air Cleaner	Vokes Dry Type.
Gear Box	Albion "E.J." 3 forward speeds.
Transmission	Roller Chains.
Drive Wheel	14" x 3" Pneumatic.
Length (overall)	5 ft.
Height (excluding handlebars)	3 ft.
